

MODERN BUSINESS INTELLIGENCE

DATA DRIVEN BUSINESS TRANSFORMATION

ACCELERATE YOUR BUSINESS GROWTH WITH THE POWER OF DATA

Diacto specializes in providing end-to-end Business Intelligence (BI) and Data Analytics Solutions enabling business leaders to solve complex problems and answer business questions with real-time data. Our BI Solution intelligently integrates, cleanses and transforms data from disparate sources into a single source of truth platform. This platform offers the flexibility of generating numerous business relevant KPI Dashboards, Reports and Visualizations providing actionable business insights based on real-time, accurate and validated information. Whether your data is in simple spreadsheets, databases, ERP or CRM applications; whether data is on-premise, in the cloud or harvested from IoT devices, Diacto can bring it all together quickly and cost-effectively, to provide you real-time intelligence on any device.

Diacto is backed by a team of experts with a deep understanding of technology and many years of experience in BI implementation for global organizations. Diacto understands that each customer has unique challenges and the business scenarios differ for every organization. Diacto provides guidance for each customer through their digital transformation journey from start to finish, investing resources to intrinsically understand how data insights can help customers drive change and business growth.

“ The ease of doing business with Diacto and the speed in which they delivered results enabled us to see into the business in ways we never had before ”

- Todd Finders,
CIO, Barry Wehmiller

WE SOLVE THE DATA PUZZLE

Every business leader needs a 360° view into their organization to drive business growth and continued success. Often times extracting this data from complex, disparate and siloed systems is time consuming and resource intensive. Hence, many enterprises are not able to leverage the massive amounts of data generated within the organization to perform advanced and predictive analytics necessary to answer business questions and stay ahead of their competitors. Leaders around the world agree that their business decision-making would transform if data could be made available to them in real time and instantly through a system, independent of manual intervention and is accessible through any device.

Diacto has made that possible. Our world class business intelligence platform is a sophisticated solution designed to dynamically integrate data from thousands of sources, turn data into instant live visualizations and extend BI directly into workflows and applications that empower an entire organization, improving productivity significantly and driving down cost.

Diacto is dedicated to bringing **speed** and **quality** to your digital transformation journey – ensuring complete success in the process of integrating the Business Management Solution in your organization.

“ My Domo team at Diacto is wonderful to work with and always deliver what I ask. I’m extremely happy with the work that they have done thus far. ”

WHY LOOK OUTSIDE YOUR ORGANIZATION?

A Gartner research says, 70-80% BI projects around the world fail. This is because most of the organizations don't have the right team with business perspective, knowledge & experience to get BI processes and implementation right the first time. The typical cost of employing a single BI qualified resource is approximately US\$75k per year and the chances are that one resource would not suffice. This coupled with investment in infrastructure and licenses makes BI altogether unattainable for most organizations. Therefore, it is important to partner with a solution provider that understands the power of data and how it can be aligned to your business KPIs, directly impacting your bottom-line.

Diacto has mastered the art of solving data problems quickly and effectively, with dozens of projects executed globally with a 100% success rate. With Diacto, you do not have to worry about risk, performance, scalability, support and maintenance. No matter where your data is located or is in any format, we can connect, integrate, transform and deploy world class living and interactive dashboards within days. Diacto's Business Intelligence and Data Analytics offering can help you reduce cost, streamline your business analytics process and provide actionable insights enabling better business decisions without the heavy investment in technology, infrastructure or personnel.

PRODUCTS & SERVICES

Diacto's Business Intelligence Solutions are helping organizations around the world discover, analyze and consume data like never before. Irrespective of the industry, size or complexity of data sources, Diacto offers a range of Business Intelligence products and services to meet almost any budget.

We have such a fantastic partnership with Diacto. You are an incredible team, and we feel so fortunate to be able to work with you guys!

- Domo

Extending Domo into Finance seems one of our most impactful IT projects that will enable faster cashflow. We were expecting this project to take at least 6 months but because of Diacto's thorough understanding of the domain and the platform, the project got completed within 6 weeks!

- CFO, Global Precision Component Manufacturer

BI PLATFORM LICENSING SERVICES

Diacto is an authorised reseller for Domo license. We provide licence options for Enterprise and Professional versions. Diacto does not just offer very cost-effective solutions to our customers due to the scale at which we operate, but we also provide a dedicated Customer Success Manager.

BI CONSULTING & IMPLEMENTATION SERVICES

Diacto has a team of certified professionals with expertise for consultation and implementation of complete data management and analytics, on-prem and on cloud, for leading BI tools such as Domo, Power BI and Tableau. The team of experts have successfully implemented over sixty BI projects for global organizations.

BI SUPPORT & MAINTENANCE SERVICES

We provide skilled resources as an extension of your IT team for maintenance, support and development of your existing BI environment, coupled with services to transform your environment for the future.

PRODUCTS & SERVICES

I have been very impressed with the Diacto team which has come on board for us recently. They have proven to be very responsive and knowledgeable.

- IT Head, Global Electronic Equipment Manufacturer

The team I have been working with at Diacto are all VERY knowledgeable, flexible, hard-working and patient. It is a pleasure to work with them

- COO, Fortune-100 Global Pharma Company

BUSINESS INTELLIGENCE AS A SERVICE (BIAAS)

Diacto provides an end-to-end BI Solution under one umbrella, including licensing, implementation, maintenance and 24x7 support. Diacto also offers a unique BIAAS 'subscriber' plan which makes world class BI accessible to small and medium scale enterprises with minimal investment in hardware, software, human resources and no long-term commitments.

ORACLE EBS REPORTING & ANALYTICS

Diacto provides reporting and analytics solution built for Oracle E-Business Suite (EBS) Application. Our BI solution intelligently connects to Oracle EBS to pull, transform, and deliver living and interactive dashboards very cost-effectively within a few days.
